Fuente: Elaboración propia a partir de la Encuesta de Población Activa, INE

Nota: A partir del I trimestre de 2002, y con carácter retroactivo desde el I trimestre de 2001, el INE cambia la metodología de la EPA. Los datos de esta tabla están recalculados, pero solo se incluye la nueva definición de parados a partir del I trimestre de 2001, por ello, sólo la tasa de ocupación puede ser comparada antes y después de ésta fecha.

Nota 2: 1982-2003 (IV Trimestres)
